

Employee Management

Requirement

Admin users must be able to add, edit, search and view employee information.

Acceptance criteria

- 1 Admin should be able to add a new employee by providing the required employee information.
- 2 Admin should be able to edit an existing employee's information and save the changes successfully.
- 3 Admin should be able to search for an existing employee using available search criteria. .
- 4 Admin should be able to view the information of an existing employee.
- 5 The system should validate required employee information when adding or editing an employee.
- 6 Employee information should be saved correctly after a successful add or edit operation.

Test scenarios

Test id	Test scenarios
TS_Emp_001	Verify admin can add an employee with valid information.
TS_Emp_002	Verify required employee fields are validated when adding an employee.
TS_Emp_003	Verify validation messages are displayed when required fields are left empty
TS_Emp_004	Verify employee cannot be added with invalid information
TS_Emp_005	Verify employee information is saved after successfully adding an employee.
TS_Emp_006	Verify duplicate employee information/Employee ID cannot be added if duplicates are not allowed.
TS_Emp_007	Verify admin can edit existing employee information.
TS_Emp_008	Verify edited employee information is saved successfully.
TS_Emp_009	Verify required fields are validated when editing employee information. .
TS_Emp_010	verify editing one employee field does not unintentionally modify other fields.

TS_Emp_011	Verify employee information can be updated multiple times successfully.
TS_Emp_012	Verify admin can search for an existing employee.
TS_Emp_013	Verify search results display the correct employee information
TS_Emp_014	Verify appropriate behavior when searching for a non-existing employee.
TS_Emp_015	Verify appropriate behavior when performing a search without entering search criteria.
TS_Emp_016	Verify admin can view the details of an existing employee.
TS_Emp_017	Verify displayed employee information matches the saved employee information.
TS_Emp_018	Verify cancelling the Add Employee operation does not save the entered information.
TS_Emp_019	Verify cancelling an edit does not modify existing employee information.

Test case

TS_Emp_001 —Verify admin can add an employee with valid information.

Test case id	TC_Emp_001.
Title	Verify admin can add an employee with valid information.
Precondition	Admin user is logged in
Test data	Name = Ram class Id = 001 Department = Qa Salary = 50000
Steps	1 open employee management 2 click add employee 3 Enter valid employee information. 4 click save

Excepted result	New employee should be created successfully and the employee information should be saved
Actual result	To be recorded
Status	Not executed
Priority	High

TS_Emp_002 —Verify required employee fields are validated when adding an employee.

Test case id	TC_Emp_002__001
Title	Verify employee cannot be added when name is valid and id fields is empty.
Precondition	Admin user is logged in
Test data	Name = Ram class Id =
Steps	1 open employee management 2 click add employee 3 enter name field and leave id empty 4 click save
Excepted result	Validation messages should appear and employee should not be added
Actual result	To be recorded
Status	Not executed
Priority	High

TS_Emp_002-002 —Verify required employee fields are validated when adding an employee.

Test case id	TC_Emp_002__002
Title	Verify employee cannot be added when name field is empty and id field is filled
Precondition	Admin user is logged in
Test data	Name = Id =002
Steps	1 open employee management 2 click add employee 3 leave name field and id field filled 4 click save
Excepted result	Required field is shown below name field
Actual result	To be recorded
Status	Not executed
Priority	High

TS_Emp_003 —Verify required employee fields are validated when adding an employee.

Test case id	TC_Emp_003
Title	Verify employee cannot be added when all required fields are empty
Precondition	Admin user is logged in
Test data	Name = Id =
Steps	1 open employee management 2 click add employee 3 leave name field and id field empty 4 click save
Excepted result	Required message is shown below
Actual result	To be recorded
Status	Not executed
Priority	High

TS_Emp_004 —Verify employee cannot be added with invalid information.

Test case id	TC_Emp_004
Title	Verify employee cannot be added with invalid information
Precondition	Admin user is logged in
Test data	Name = hari man Id =123456
Steps	1 open employee management 2 click add employee 3 Enter invalid name and invalid id 4 click save
Excepted result	Error message should be shown
Actual result	To be recorded
Status	Not executed
Priority	High

TS_Emp_005 —Verify employee information is saved after successfully adding an employee.

Test case id	TC_Emp_005
Title	Verify employee information is saved after successfully adding an employee.
Precondition	Admin user is logged in
Test data	Name = Ram class Id =001
Steps	1 open employee management 2 click add employee 3 Enter invalid name and invalid id 4 click save
Excepted result	Success message is shown and information is saved
Actual result	To be recorded
Status	Not executed
Priority	High

TS_Emp_006 —Verify duplicate employee information/Employee ID cannot be added if duplicates are not allowed.

Test case id	TC_Emp_006
Title	Verify duplicate employee information/Employee ID cannot be added if duplicates are not allowed.
Precondition	Admin user is logged in
Test data	Name = Ram class Id =001
Steps	1 open employee management 2 click add employee 3 Enter valid name and valid id 4 click save
Excepted result	Employee is added (as duplicate is allowed)
Actual result	To be recorded
Status	Not executed
Priority	High

TS_Emp_007 —Verify admin can edit existing employee information.

Test case id	TC_Emp_007
Title	Verify admin can edit existing employee information
Precondition	Admin user is logged in
Test data	Name = Ram class Id =001 DOB DL Num Nationality Gender
Steps	1 open employee management 2 Open employee list 3 Search for an existing employee. 4 Select the employee. 5 Click Edit 6 Change the required field. 7 Click Save.
Excepted result	Successful message is shown
Actual result	To be recorded
Status	Not executed
Priority	High

TS_Emp_008 —Verify edited employee information is saved successfully

Test case id	TC_Emp_008
Title	Verify edited employee information is saved successfully
Precondition	Admin user is logged in
Test data	Name = Ram class Id =001 DOB DL Num Nationality Gender
Steps	1 open employee management 2 Open employee list 3 Search for an existing employee. 4 Select the employee. 5 Click Edit 6 Change the required field. 7 Click Save. 8 Verify the updated information
Excepted result	Successful message is shown and it is changed in the system
Actual result	To be recorded
Status	Not executed
Priority	High

TS_Emp_009 —Verify required fields are validated when editing employee information.

Test case id	TC_Emp_009
Title	Verify required fields are validated when editing employee information.
Precondition	Admin user is logged in
Test data	Name = Ram class Id =001 DOB DL Num Nationality Gender
Steps	1 open employee management 2 click employee list 3 Enter valid name valid id , dob dl num nationality and gender 4 click save
Excepted result	Required message is shown below not filled fields
Actual result	To be recorded
Status	Not executed
Priority	High

TS_Emp_010 —verify editing one employee field does not unintentionally modify other fields

Test case id	TC_Emp_010
Title	verify editing one employee field does not unintentionally modify other fields
Precondition	Admin user is logged in
Test data	Name = Ram class Id =001 DOB DL Num Nationality Gender
Steps	1Open Employee List. 2 Search for employee ID 001. 3 Open the employee. 4 Change Department from QA to Development. 5 Save. 6 Check Name, Employee ID, DOB, Nationality and Gender.
Excepted result	Nothing is changed on other field
Actual result	To be recorded
Status	Not executed
Priority	High

TS_Emp_011 —Verify employee information can be updated multiple times successfully.

Test case id	TC_Emp_011
Title	Verify employee information can be updated multiple times successfully.
Precondition	Admin user is logged in
Test data	Name = Ram class Id =001 DOB DL Num Nationality Gender
Steps	1 open employee management 2 click employee list 3 Enter valid name valid id , dob dl num nationality and gender 4 click save 5 try same steps again
Excepted result	Successful message is shown
Actual result	To be recorded
Status	Not executed
Priority	Medium

TS_Emp_012 —Verify admin can search for an existing employee

Test case id	TC_Emp_012
Title	Verify admin can search for an existing employee
Precondition	Admin user is logged in
Test data	Name = Ram class Id =001 DOB DL Num Nationality Gender
Steps	1 open dashboard 2 put employee id or name 3 click search
Excepted result	Employee information should be shown
Actual result	To be recorded
Status	Not executed
Priority	Medium

TS_Emp_013 —Verify admin can search for an existing employee

Test case id	TC_Emp_013
Title	Verify search results display the correct employee information
Precondition	Admin user is logged in
Test data	Name = Ram class Id =001
Steps	1 open dashboard 2 put employee id or name 3 click search
Excepted result	Employee information should be shown
Actual result	To be recorded
Status	Not executed
Priority	Medium

TS_Emp_014 —Verify appropriate behavior when searching for a non-existing employee.

Test case id	TC_Emp_014
Title	Verify appropriate behavior when searching for a non-existing employee.
Precondition	Admin user is logged in
Test data	Name = Hari class Id =001
Steps	1 open dashboard 2 put invalid employee id or name 3 click search
Excepted result	No record found message is display
Actual result	To be recorded
Status	Not executed
Priority	Medium

TS_Emp_015 —Verify appropriate behavior when performing a search without entering search criteria.

Test case id	TC_Emp_015
Title	Verify appropriate behavior when performing a search without entering search criteria. .
Precondition	Admin user is logged in
Test data	Name = Ram class Id =001
Steps	1 open dashboard 2 do not put any information 3 click search
Excepted result	Nothing happens no message is display and user remain in dashboard
Actual result	To be recorded
Status	Not executed
Priority	Medium

TS_Emp_016 —Verify admin can view the details of an existing employee.

Test case id	TC_Emp_016
Title	Verify admin can view the details of an existing employee. .
Precondition	Admin user is logged in
Test data	Name = Ram class Id =001
Steps	1 open dashboard 2 put valid information on search 3 click search
Excepted result	Admin see the employee information
Actual result	To be recorded
Status	Not executed
Priority	Medium

TS_Emp_017 —Verify displayed employee information matches the saved employee information..

Test case id	TC_Emp_017
Title	Verify displayed employee information matches the saved employee information.. .
Precondition	Admin user is logged in
Test data	Name = Ram class Id =001
Steps	1 open dashboard 2 put valid information on search 3 click search 4 check if the information matches the employee information
Excepted result	It matches with the existing employee
Actual result	To be recorded
Status	Not executed
Priority	Medium

TS_Emp_018 —Verify cancelling the Add operation does not save the entered information.

Test case id	TC_Emp_018
Title	Verifying cancelling the Add operation does not save the entered information. .. .
Precondition	Admin user is logged in
Test data	Name = Ram class Id =001
Steps	1 open add employee 2 put valid information 3 click cancel 4 see if the information is saved
Excepted result	Information is not saved
Actual result	To be recorded
Status	Not executed
Priority	Medium

TS_Emp_019 —Verify cancelling an edit does not modify existing employee information.

Test case id	TC_Emp_019
Title	Verify cancelling an edit does not modify existing employee information. . .
Precondition	Admin user is logged in
Test data	Name = Ram class Id =001
Steps	1 open add employee 2 put valid information 3 click cancel 4 see if the information is saved
Excepted result	Information is not saved
Actual result	To be recorded
Status	Not executed
Priority	Medium

Test Execution

TCID	Test case	Expected result	Actual result	Status
TC_Emp_001	Verify admin can add an employee with valid information	New employee should be created successfully and the employee information should be saved	New employee should be created successfully and the employee information should be saved	Pass
TC_Emp_002__	Verify employee cannot be added when name is valid and id fields is empty.	Validation messages should appear and employee should not be added	New employee is added	Fail
TC_Emp_002__002	Verify employee cannot be added when name field	Required field is shown below name field	Required field is shown below name field	Pass

	is empty and id field is filled			
TC_Emp_003	Verify employee cannot be added when all required fields are empty	Required message is shown below	Required message is shown below	Pass
TC_Emp_004	Verify employee cannot be added with invalid information	Error message should be shown	Employee is added	Fail
TC_Emp_005	Verify employee information is saved after successfully adding an employee	Success message is shown and information is saved	Success message is shown and information is saved	Pass
TC_Emp_006	Verify duplicate employee information/Employee ID cannot be added if duplicates are not allowed.	Employee is added (as duplicate is allowed)	Employee is added	Pass
TC_Emp_007	Verify admin can edit existing employee information	Successful message is shown	Successful message is shown	Pass
TC_Emp_008	Verify edited employee information is saved successfully	Successful message is shown and it is changed in the system	Successful message is shown and it is changed in the system	Pass
TC_Emp_009	Verify required fields are validated when editing employee information	Required message is shown below not filled fields	It is edited	Fail

TC_Emp_010	verify editing one employee field does not unintentionally modify other fields	Nothing is changed on other field	Nothing is changed on other field	Pass
TC_Emp_011	Verify employee information can be updated multiple times successfully.	Successful message is shown	Successful message is shown	Pass
TC_Emp_012	Verify admin can search for an existing employee	Employee information should be shown	Employee information should be shown	Pass
TC_Emp_013	Verify search results display the correct employee information	Employee information should be shown	Employee information should be shown	Pass
TC_Emp_014	Verify appropriate behavior when searching for a non-existing employee	No record found message is display	No record found message is display	Pass
TC_Emp_015	Verify appropriate behavior when performing a search without entering search criteria.	Nothing happens no message is display and user remain in dashboard	All records are shown	Defect
TC_Emp_016	Verify admin can view the details of an existing employee.	Admin see the employee information	Admin see the employee information	Pass
TC_Emp_017	Verify displayed employee information matches the saved employee information.	It matches with the existing employee	It matches with the existing employee	Pass

TC_Emp_018	Verifying cancelling the Add operation does not save the entered information.	Information is not saved	Information is not saved	Pass
TC_Emp_019	Verify cancelling an edit does not modify existing employee information.	Information is not saved	Information is not saved	Pass

Bug report

Bug ID: BUG_EMP_001

Related Test Case: TC_EMP_002

Title: Employee can be added without required Employee ID

Severity: Major

Priority: High

Status:

New

Environment: OrangeHRM / Brave / Windows

Precondition

- Admin user is logged in.
- Admin is on the Add Employee page.

Steps:

1. Login as Admin.
2. Open Employee Management.
3. Click Add Employee.
4. Enter valid employee information except Employee ID.
5. Click Save.

Expected:

Validation message should be displayed and employee should not be created.

Actual:

Employee is created despite the required field being empty.

Evidence

The screenshot displays a user interface for managing employee information. On the left is a sidebar with a profile picture placeholder and a list of navigation links: Personal Details, Contact Details, Emergency Contacts, Dependents, Immigration, and Job. The 'Personal Details' link is selected. The main area is titled 'Personal Details' and contains several form fields:

- Employee Full Name***: A three-part input field with '12345' in the first part, 'Middle Name' in the second, and '12345' in the third.
- Employee Id**: A single-line text input field.
- Other Id**: A single-line text input field.
- Driver's License Number**: A single-line text input field.
- License Expiry Date**: A date picker field showing 'yyyy-dd-m...' and a calendar icon.
- Nationality**: A dropdown menu with '-- Select --' and a downward arrow.
- Marital Status**: A dropdown menu with '-- Select --' and a downward arrow.
- Date of Birth**: A label for a field that is partially visible at the bottom.
- Gender**: A label for a field that is partially visible at the bottom.

Title: Employee can be added with invalid employee information

Module: Employee Management → Add Employee

Severity: Major

Priority: High

Status: New

Precondition

- Admin user is logged in.
- Admin is on the Add Employee page.

Test Data

Invalid employee information as used in TC_EMP_004.

Steps to Reproduce

1. Login as an Admin.
2. Navigate to **Employee Management**.
3. Open **Add Employee**.
4. Enter invalid employee information.
5. Click **Save**.

Expected Result

The system should reject the invalid employee information and display an appropriate validation message. The employee should not be added.

Actual Result

The system allows the employee to be added with invalid employee information.

Title: Employee information can be edited without completing required fields

Module: Employee Management → Edit Employee

Severity: Major

Priority: High

Status: New

Preconditions

- Admin user is logged in.
- An existing employee is available.
- Admin has opened the employee's edit page.

Steps to Reproduce

1. Login as an Admin.
2. Navigate to **Employee Management**.
3. Open the employee list.
4. Select an existing employee.
5. Click **Edit**.
6. Leave a required employee field empty.
7. Click **Save**.

Expected Result

The system should display an appropriate validation message for the required field and should not save the changes.

Actual Result

The employee information is edited/saved even though the required field is empty.
