

Leave

Requirement

Users must be able to apply for leave and view their leave information.

Acceptance criteria

- 1 User should be able to apply for leave with valid information.
- 2 The system should display validation messages when required fields are left empty.
- 3 User should not be able to submit a leave application with invalid information.
- 4 The system should display an appropriate success or error message after submitting a leave application.
- 5 User should be able to view their submitted leave information and current leave status.

Test scenarios

Test ID	Test scenarios
Ts __leave__001	Verify user can apply for leave with valid information.
Ts __leave__002	Verify required field validation is displayed when mandatory fields are left empty.
Ts __leave__003	Verify user cannot apply for leave with invalid information.
Ts __leave__004	Verify appropriate success or error message is displayed after submitting a leave application.
Ts __leave__005	Verify user can view their leave information and current leave status
Ts __leave__006	Verify user cannot submit a leave application with an invalid date range.
Ts __leave__007	Verify successfully submitted leave information is saved correctly.

Test case

Ts __leave__001— Verify user can apply for leave with valid information.

Test case id	Tc __leave__001
Title	Verify user can apply for leave with valid information.
Precondition	Admin user is logged in
Test data	Leave type = Annual leave From date 20/08/2026 To date 20/08/2026 Comment Personal leave
Steps	1 Navigate to the leave page 2 Click apply 3 Select a valid leave type 4 Enter a valid from date 5 Enter a valid to date 6 Enter valid comment 7 Click submit
Excepted result	Success message is shown
Actual result	To be recorded
Status	Not executed
Priority	High

Ts __leave__002— Verify required field validation is displayed when mandatory fields are left empty.

Test case id	Tc __leave__002__001
Title	Verify required field validation is displayed when all mandatory fields are left empty.
Precondition	Admin user is logged in

Test data	Leave type = From date = To date = Comment =
Steps	1 Navigate to the leave page 2 Click apply 3 leave leave type empty 4 leave from date empty 5 leave to date empty 6 leave comment empty 7 Click submit
Excepted result	Required field is shown below empty field
Actual result	To be recorded
Status	Not executed
Priority	High

Ts __leave__002— Verify required field validation is displayed when mandatory fields are left empty.

Test case id	Tc __leave__002__002
Title	Verify required field validation is displayed when only leave type fields is left empty.
Precondition	Admin user is logged in
Test data	Leave type = From date =20/08/2026 To date = 20/08/2026 Comment = Personal leave
Steps	1 Navigate to the leave page 2 Click apply 3 leave leave type empty 4 Enter a valid from date 5 Enter a valid to date 6 Enter valid comment 7 Click submit
Excepted result	Required field is shown below empty field
Actual result	To be recorded

Status	Not executed
Priority	High

Ts __leave__002— Verify required field validation is displayed when mandatory fields are left empty.

Test case id	Tc __leave__002__003
Title	Verify required field validation is displayed when only from date fields is left empty.
