

Description

Users should be able to log in the system using valid credentials.
Invalid credentials must not allow access.

Acceptance criteria

- 1 Username and password should be valid
- 2 Users should not be able to log in using invalid username or password.
- 3 The system should display an appropriate validation/error message when invalid credentials are submitted.
- 4 Username and password fields should required to be filled .
- 5 Users should be redirected to the Dashboard after successful login.
- 6 The "Forgot Password" option should navigate the user to the password recovery page.
- 7 After logout, the user should not be able to access authenticated pages without logging in again.
- 8 The login page should prevent submission when required credentials are missing.
- 9 After logout, the user should not be able to access authenticated pages without logging in again

Test Scenarios

Scenarios ID	Test Scenarios
Ts_log_001	Verify login with valid information
Ts_log_002	Verify login fails with invalid information
Ts_log_003	Verify login fails with valid username and invalid password
Ts_log_004	Verify login fails with invalid username and valid password
Ts_log_005	Verify login fails with empty username and empty password
Ts_log_006	Verify login fails with valid username and empty password
Ts_log_007	Verify login fails with empty username and valid password
Ts_log_008	Verify login fails while network is turn off

Ts_log_009	Verify login in multiple tabs at the same time
Ts_log_010	Verify user can log in after logging out
Ts_log_011	Verify login works after refreshing the page
Ts_log_012	Verify login session expires after the expected timeout
Ts_log_013	Verify "Forgot Password" link redirects to the password recovery page
TS_LOG_014	Verify authenticated pages cannot be accessed after logout

Test case

Ts_log_001 —valid login

Title	Tc_log_001
Description	Verify login with valid information
Precondition	User is in login page
Test data	Admin admin123
Test steps	1 Navigate to login page 2 Enter valid username and password 3 click login
Expected result	User is redirected to homepage
Actual result	To be recorded
Status	Not executed
Priority	High

Ts_log_002 —Verify login with invalid information

Title	Tc_log_002
Description	Verify login with invalid information
Precondition	User is in login page
Test data	admin 123 admin123455
Test steps	1 Navigate to login page 2 Enter invalid username and password 3 click login
Expected result	Invalid credentials message is displayed
Actual result	To be recorded
Status	Not executed
Priority	High

Ts_log_003 —Verify login fails with valid username and invalid password

Title	Tc_log_003
Description	Verify login fails with valid email and invalid password
Precondition	User is in login page
Test data	Admin admin12345
Test steps	1 Navigate to login page 2 Enter valid username and invalid password 3 click login
Expected result	Invalid credentials message is displayed
Actual result	To be recorded

Status	Not executed
Priority	High

Ts_log_004 —Verify login fails with invalid username and valid password

Title	Tc_log_004
Description	Verify login fails with invalid username and valid password
Precondition	User is in login page
Test data	Admin123 admin123
Test steps	1 Navigate to login page 2 Enter invalid username and valid password 3 click login
Expected result	Invalid credentials message is displayed
Actual result	To be recorded
Status	Not executed
Priority	High

Ts_log_005 —Verify login fails with empty username and empty password

Title	Tc_log_005
Description	Verify login fails with empty username and empty password
Precondition	User is in login page
Test data	
Test steps	1 Navigate to login page 2 click login

Expected result	Required message is shown below username and password
Actual result	To be recorded
Status	Not executed
Priority	High

Ts_log_006 —Verify login fails with valid username and empty password

Title	Tc_log_006
Description	Verify login fails with valid username and empty password
Precondition	User is in login page
Test data	Admin
Test steps	1 Navigate to login page 2 Enter valid username and no password 2 click login
Expected result	Required message is shown below password
Actual result	To be recorded
Status	Not executed
Priority	High

Ts_log_007 —Verify login fails with empty username and valid password

Title	Tc_log_007
Description	Verify login fails with empty username and valid password
Precondition	User is in login page
Test data	admin123
Test steps	1 Navigate to login page 2 Enter no username and valid password 2 click login
Expected result	Required message is shown below username
Actual result	To be recorded
Status	Not executed
Priority	High

Ts_log_008 —Verify login fails while network is turn off

Title	Tc_log_008
Description	Verify login fails while network is turn off
Precondition	User is in login page
Test data	Admin admin123
Test steps	1 Navigate to login page 2 Enter username and valid password 3 turn off network while pressing login 4 click login
Expected result	Error message should be displayed
Actual result	To be recorded
Status	Not executed

Priority	Medium
----------	--------

Ts_log_009 —Verify login in multiple tabs at the same time

Title	Tc_log_009
Description	Verify login in multiple tabs at the same time
Precondition	User is in login page
Test data	Admin admin123
Test steps	1 Navigate to login page 2 Enter username and valid password 3 click login in multiple tabs
Expected result	User is redirected to homepage
Actual result	To be recorded
Status	Not executed
Priority	Medium

Ts_log_010 —Verify user can log in after logging out

Title	Tc_log_010
Description	Verify user can log in after logging out
Precondition	User is in login page
Test data	Admin admin123
Test steps	1 click login 2verify dashboard 3 click logout 4 return to login page

	5 enter valid credential 6 click login
Expected result	User is redirected to homepage
Actual result	To be recorded
Status	Not executed
Priority	High

Ts_log_011 —Verify login works after refreshing the page

Title	Tc_log_011
Description	Verify login works after refreshing the page
Precondition	User is in login page
Test data	Admin admin123
Test steps	1 Navigate to login page 2 Enter username and valid password 3 click login 4 verify dashboard 5 refresh the page 6 observe the result
Expected result	User remains in dashboard
Actual result	To be recorded
Status	Not executed
Priority	High

Ts_log_012 —Verify login session expires after the expected timeout

Title	Tc_log_012
Description	Verify login session expires after the expected timeout
Precondition	User is in dashboard
Test data	Admin admin123
Test steps	1 successfully login 2 stay inactive for certain period of time (15 minutes) 3 attempt ot access or use the application 4 observe the result
Expected result	User is logout
Actual result	To be recorded
Status	Not executed
Priority	High

Ts_log_013 —Verify "Forgot Password" link redirects to the password recovery page

Title	Tc_log_013
Description	Verify "Forgot Password" link redirects to the password recovery page
Precondition	User is in login page
Test data	Admin admin123
Test steps	1 Navigate to login page 2 click forgot password 3 observe the page
Expected result	User is taken to forget password page
Actual result	To be recorded

Status	Not executed
Priority	High

Ts_log_014 —Verify authenticated pages cannot be accessed after logout.

Title	Tc_log_014
Description	Verify authenticated pages cannot be accessed after logout.
Precondition	User is in login page
Test data	Admin admin123
Test steps	1Login with valid credentials. 2 Verify Dashboard is displayed. 3 Click Logout. 4 Use the browser Back button or try to access the 5 Dashboard URL. 6 Observe the result.
Expected result	User is returned to login page
Actual result	To be recorded
Status	Not executed
Priority	High

Test Execution

TCID	Test case	Expected result	Actual result	Status
------	-----------	-----------------	---------------	--------

Tc_log_001	Verify login with valid information	User is redirected to homepage	User is redirected to homepage	Pass
Tc_log_002	Verify login fails with invalid information	Invalid credentials message is displayed	Invalid credentials message is displayed	Pass
Tc_log_003	Verify login fails with valid username and invalid password	Invalid credentials message is displayed	Invalid credentials message is displayed	Pass
Tc_log_004	Verify login fails with invalid username and valid password	Invalid credentials message is displayed	Invalid credentials message is displayed	Pass
Tc_log_005	Verify login fails with empty username and empty password	Required message is shown below username and password	Required message is shown below username and password	Pass
Tc_log_006	Verify login fails with valid username and empty password	Required message is shown below password	Required message is shown below password	Pass
Tc_log_007	Verify login fails with empty username and valid password	Required message is shown below username	Required message is shown below username	Pass
Tc_log_008	Verify login fails while network is turn off	Error message should be displayed	Error message should be displayed	Pass
Tc_log_009	Verify login in multiple tabs at the same time	User is redirected to homepage	User is redirected to homepage	Pass
Tc_log_010	Verify user can log in after logging out	User is redirected to homepage	User is redirected to homepage	Pass
Tc_log_011	Verify login works after	User remains in dashboard	User remains in dashboard	Pass

	refreshing the page			
Tc_log_012	Verify login session expires after the expected timeout	User is logout	User is logout	Pass
Tc_log_013	Verify "Forgot Password" link redirects to the password recovery page	User is taken to forget password page	User is taken to forget password page	Pass
Tc_log_014	Verify authenticated pages cannot be accessed after logout.	User is returned to login page	User is returned to login page	Pass
